Paper Trade Journal–Volume 155–Year 1971
Index to Feature Articles

The articles listed below are cross-referenced for the convenience of users.
Short items and news stories are not included in this index.

	PAGE	ISSUE
Board Manufacture		
Air flow and pocket ventilation in the dryer section —Mauri A. Soininen	39	March 8
Choosing hard nip press felts for optimum drying results —Axel V. Cedercreutz	34	June 7
Control of final moisture in sheet when using a continuous gauge —T. Olson	40	Jan. 25
Control of paper and board quality featured at British conference	54	May 3
Drying—present methods and trends discussed at U. K. meeting	31	Dec. 27
Factors influencing venta-nip press water removal efficiency —C. Neil Rempel	28	Dec. 27
Greater use of secondary fiber by application of dry forming —Fred D. Iannazzi	44	Oct. 25
How the drainage from foils differs from that of table rolls —Thomas O. P. Speidel & Norman Beauchemin	68	March 15
How the fiber-water relationship affects the drying process —D. Attwood	31	Feb. 8
Improved dryer felt arrangement yields a number of benefits —E. E. Crist	30	Dec. 27
Is the dry forming of conventional paper grades feasible today?	40	Sept. 6
Mechanisms of paper drying on steam-heated cylinders E. Race	32	March 1
New combination fabric fully proven for wet press clothing —Thomas J. Liu	30	May 31
New concept of through drying of paper is rapidly gaining ground —Edward T. Bryand	64	March 15
New four group concept for the selection of dryer felts —Joseph F. Longo & Edward F. DeCrosta	35	Oct. 4
Orr's Triplex: A new three-fabric concept in paper makers' felts	37	July 26
Paper drying on felt-covered cylinders—function of the felt —E. Race	38	March 29
Paperboard houses now approved for all exposures by FHA	53	Aug. 23
Polyester monofilament forming fabrics for fourdriniers —E. R. Cruden & Colin Wild	38	Jan. 11
Pressure/vacuum pulse analysis shows advantages of foils —Thomas O. P. Speidel & Norman Beauchemin	32	April 26
Secondary fiber for paperboard—how the waste paper is processed —Roger H. Cunningham	65	Sept. 13
Secondary fiber requirements for corrugating medium —Kenneth E. Lowe	51	Feb. 15
Significant trends in paper machine design and operation-I —John C. W. Evans & Charles Waelde	30	Aug. 9
Significant trends in paper machine design and operation-II —John C. W. Evans & Charles Waelde	42	Aug. 16
Signs of life in paperboard —J. Rodney Edwards	44	July 12
Some improvement in paperboard but basic problems continue —John C. W. Evans	42	July 12
Suction boxes, new felts enhance water removal at press section —E. Richard Woodard	30	March 8
Synthetic dryer fabric screens versus conventional dryer felts —Lars Osterberg & Sven Otto Norinder	30	Feb. 1
Chemical Pulping & Bleaching		
Advances in pulpwood utilization and pulping technology —J. N. McGovern	31	Jan. 11
Autocook system brings full automation to batch digesters —Martin MacLeod	36	Aug. 16
Canadians hold successful pulping and bleaching conference	51	Dec. 13
How to readily obtain brighter pulp or smooth out variations —Herb Freedman	34	Sept. 27
Hydrogen peroxide bleaching benefits stability —Michel G. Delattre	43	July 5
Less water pollution and lower costs		

	PAGE	ISSUE
offered by O_2 bleaching	36	March 29
Mill results with continuous diffusion washers on brown stock —Gordon Rowlandson	28	Feb. 1
New monitoring method alleviates recovery furnace risks	38	Jan. 25
Physical properties of fibers and pulps from wood and nonwood plant fibers —J. N. McGovern	27	Aug. 30
TAPPI Alkaline Pulping Committee cooks up a high yield conference —Martin MacLeod	38	Dec. 6

Coating

Coating conference highlighted by comprehensive technical program	36	June 14
How the printing surface depends on the coating system used —George L. Booth	63	Sept. 20
Paper and board applications of wax are constantly growing Thomas J. Evans	50	April 19
Photocopy papers meet rapidly expanding market opportunities —John R. Danner	36	Feb. 8
Which coating clay should be used for which paper grades —Earl E. Brodhag	36	Jan. 18

Computers

Autocook system brings full automation to batch digesters —Martin MacLeod	36	Aug. 16
Business applications for computers —Roger Grant	48	Aug. 16
Computer applications—from stock preparation to shipping—I —Roger Grant	38	July 19
Computer applications from stock preparation to shipping—II —Roger Grant	38	July 26
Computer applications in departments supporting production —Roger Grant	38	Aug. 9
Computer applications: woodlands through bleach plant—I —Roger Grant	44	June 14
Computer applications: woodlands through bleach plant—II —Roger Grant	36	June 21
Computerized paper machine runs efficiently at Nekoosa Edwards —Edward T. Tesch	46	May 24
Control theory and how to use it —Roger Grant	38	March 1
Coordinated control a workable alternative to computerization —Dana A. Hambleton	34	May 31
Digital and analog computers, their hardware and how they work—I —Roger Grant	38	Jan. 18
Digital and analog computers, their hardware and how they work—II —Roger Grant	36	Feb. 1
Explaining the fundamentals of digital process computers —Roger Grant	48	Jan. 4
Glossary of basic computer terms —Roger Grant	42	April 12
Types of computers and their methods of application —Roger Grant	30	March 29

Converting

Corrugated box industry economics in 1971 —P. L. Brockington	76	Nov. 15
Everything but profits booming for corrugated producers	72	Nov. 15
Future of inking and ink drying may lie in new technology —Alex Glassman	59	Sept. 20
How the printing surface depends on the coating system used —George L. Booth	63	Sept. 20
New laminator helps achieve production increase at Simplex	31	April 26
Nonwovens and disposables attract wide interest at IDEA 71	46	Dec. 6
Paper and board applications of wax are constantly growing —Thomas J. Evans	50	April 19
Photocopy papers meet rapidly expanding market opportunities —John R. Danner	36	Feb. 8
Printing characteristics of papers containing non-wood fibers —Dr. Julius Grant	55	Sept. 20
Production of non-wovens on the paper machine and their use —W. Willicks	45	May 24
The first one hundred years of corrugated —Donald B. Pooley	74	Nov. 15
Unique handling system developed for tissue converting at Crossett	56	June 28

Economics and Business

Canadian annual meeting held in atmosphere of economic concern	72	Feb. 22
Corrugated box industry economics in 1971 —P. L. Brockington	76	Nov. 15
Hopeful optimism was keynote of feeling at API annual meeting	38	April 5
How financial community leaders view our industry & companies	50	May 10
How many $ $ $ are you losing on pulp bale moisture? —Herbert Freedman	47	Jan. 25
How the industry adjusted to reduced consumption in 1970	44	April 5
Paper industry appears on threshold of its most promising years —Ralph W. Michaud	38	Sept. 27
Recovery of confidence	75	Feb. 22
U. S. Capacity survey shows small increase through 1974	40	Nov. 22
World exports of kraft linerboard and corrugating medium —Irene W. Meister	22	Aug. 2

Engineering

A systematic procedure to examine

	PAGE	ISSUE
paper machine modernization ...	57	May 17
Boise Southern power demand control saves purchased power	22	Aug. 30
Developments in the total energy concept for pulp and paper mills —James M. Tucker, Jr.	30	Aug. 2
Diversified program highlights TAPPI engineering conference	33	Dec. 20
Effect of molybdenum and welds on stainless steel corrosion —Vaino Sailas & Ville Sipila	66	June 28
Factors to consider in selecting air pollution control equipment —James E. Roberson	40	June 7
Hammermill is installing largest thermoplastic pipeline	31	Jan. 4
Metal fatigue isn't inevitable in mill equipment —David Krashes	30	March 1
Modern practices can present hazards to S. S. suction rolls —E. B. Dahl & E. P. Neubauer ..	46	Aug. 23
Power belt core offers advantages on cone pulley drives —Kenneth Tsunoda	38	Feb. 8
Proper selection of chain slings holds key to safe load lifting —W. E. Drayton	45	Jan. 18
What stainless steels where in your continuous pulping plant?	46	Aug. 16
Finishing		
Electrostatic charges prove useful to new sheeting system	34	July 19
Finishing conference program winds a "soft roll" in Houston —Martin MacLeod	40	Nov. 29
Horizontal steel strapping solves a tough packaging problem	38	Nov. 1
Interlake equipment highlights finishing operation at IP mill	53	May 17
Magnetic curl breaker straightens curved paper at core centers —D. Noel Obenshain	40	Aug. 16
Nekoosa label "production system" features photo-direct process	36	Aug. 30
New high capacity roll wrapping system at Bowaters Newfoundland ..	32	Sept. 27
SCM's automatic sheeting system protects fragile photocopy paper —Peter J. Eberth	40	April 19
Watervliet switches from steel to fiberglass paper cores	49	May 10
Forecasts		
How will we meet future fiber demand of the paper industry? —G. W. Kalotschke	64	June 28
Our industry's fiber requirements in the seventies and eighties —Dr. Benjamin Slatin	42	Oct. 11
Paper grade market pulp from a European point of view —E. L. Whitehouse	36	Nov. 22
Paper industry appears on threshold of its most promising years —Ralph W. Michaud	38	Sept. 27
What's ahead in waste paper use?.. —J. Rodney Edwards	46	April 5
World paper and board demand to reach 257 million tons by 1980 ..	81	Nov. 15
Instrumentation		
Automatic stock proportioning system at Finch Pruyn	35	Jan. 18
Coordinated control a workable alternative to computerization —Dana A. Hambleton	34	May 31
Control of final moisture in sheet when using a continuous gauge —T. Olson	40	Jan. 25
Correct computer control can improve mill operations —W. R. Lehigh & R. H. Mosher	82	Nov. 15
I.S.A. pulp and paper symposium features on-machine instruments —Martin MacLeod	40	Oct. 4
Measuring water pollution with on-line sensing devices —W. C. Rutledge	29	Dec. 7
Monitoring wet stock brightness during deinking operations —M. Finkel, L. Holland & L. Raksoh	48	Dec. 6
New approach to measuring formation —A matter of uniformity —O. Kallmes	46	Oct. 25
New system controls CMD basis weight profile automatically	34	Nov. 8
Novel consistency meter for paper machine headboxes —N. Bailey & O. Kallmes	46	Sept. 6
The outlook for this year —H. F. Dunning	40	Jan. 11
International		
Enso-Gutzeit research facilities serve the industry in Finland	29	May 31
EUCEPA international conference on printability in Budapest	43	Nov. 29
French industry in 1970 bettered 1969 by more than four per cent —Francois Pasqualini	57	May 3
How to describe and test pulp properties or characteristics —Gunnar Gavelin	40	July 5
How we may get more mileage from international fiber sources —Borje K. Steenberg	59	May 17
Hungary's paper industry moves along according to plan —Laszlo Beres	68	Sept. 20
Iran's first modern mill opened by the Shah	34	Jan. 11
New synthetic coating pilot plant opens in West Germany	49	Nov. 29
Norway's small pulp and paper industry is export oriented —Erik Myhrer	62	Aug. 23
Papeles Venezolanos completes tissue expansion program	32	Oct. 4
Periformer concept a proven fact with big new machine in France —Martin MacLeod	38	Oct. 25
Rapid growth in bagasse evident as world experts gather in Spain —Martin MacLeod	30	Nov. 22
Small integrated chip groundwood		

	PAGE	ISSUE
mill started in Holland —Gunnar Gavelin	30	Dec. 20
South African industry is growing rapidly	37	April 12
Stock-type pulp drying arrangement reduces machine room size	46	May 17
Swedish industry had a poor first eight months	29	Nov. 22
Swedish industry had a very mixed but not overly weak first quarter	35	June 21
Ten year old tissue mill continues growth—now adds third machine	30	June 7
The situation abroad (waste paper)—Germany —Franz Koenig	86	Sept. 13
The situation abroad (waste paper)—Great Britain —H. K. W. Hodges	88	Sept. 13
The situation abroad (waste paper)—Japan —Martin MacLeod	84	Sept. 13
Unique Finnish lumber, pulp and paper complex in B.C.	26	July 5
Washer extractor aids cotton paper processing operation —T. A. King	38	May 31
What will happen at the 1971 EUCEPA conference —Alex Glassman	50	Sept. 20
World paper and board demand to reach 257 million tons by 1980	81	Nov. 15

Maintenance

Effect of molybdenum and welds on stainless steel corrosion —Vaino Sailas & Ville Sipila	66	June 28
High efficiency removal of oil aerosols from compressed air —Don W. Benner	49	Sept. 6
Metal fatigue isn't inevitable in mill equipment —David Krashes	30	March 1
Modern practices can present hazards to S.S. suction rolls —E. B. Dahl & E. P. Neubauer	46	Aug. 23
Proper selection of chain slings holds key to safe load lifting —W. E. Drayton	45	Jan. 18
What stainless steels where in your continuous pulping plant	46	Aug. 16

Markets & Marketing

Basis for confidence —Edwin A. Locke, Jr.	40	April 5
Disposables Assn.'s 3rd annual meeting views industry's problems	38	July 5
How the industry adjusted to reduce consumption in 1970	44	April 5
Paperboard houses now approved for all exposures by FHA	53	Aug. 23
Paper grade market pulp from a European point of view —E. L. Whitehouse	36	Nov. 22
Signs of life in paperboard —J. Rodney Edwards	44	July 12
Some improvement in paperboard but basic problems continue John C. W. Evans	42	July 12
Swedish industry had a very mixed but not overly weak first quarter	35	June 21
U. S. capacity survey shows small increase through 1974	40	Nov. 22
World exports of kraft linerboard and corrugating medium —Irene W. Meister	22	Aug. 2

Material Handling

Horizontal steel strapping solves a tough packaging problem	38	Nov. 1
Low noise from conveyors with centrifugal compressors —Edwin Farnworth	41	Feb. 1
New high capacity roll wrapping system at Bowaters Newfoundland	32	Sept. 27

Mechanical Pulping

Aspen refiner mechanical pulp for publication papers	26	Aug. 2
Current trends of refining mechanical pulp rejects —Joseph A. Kurdin	46	Jan. 18
Grinding mechanism and relationship of energy and pulp quality —D. K. Alexander	26	Aug. 9
Improved economics and better quality for mechanical pulps —Frederick G. Perry and Claire Canty	30	July 26
International mechanical pulping conference outstanding success	28	July 19
Physical properties of fibers and pulps from wood and nonwood plant fibers —J. N. McGovern	27	Aug. 30
Recent trends in the manufacture of mechanical pulps	38	Oct. 4
Small integrated chip groundwood mill started in Holland —Gunnar Gavelin	30	Dec. 20
Time to take another look at mechanical pulp fractionation? —Gunnar Gavelin	40	Nov. 1

Miscellaneous

Basis for confidence —Edwin A. Locke, Jr.	40	April 5
Disposables Assn.'s 3rd annual meeting views industry's problems	38	July 5
Employees learn what they live not what they are told —Fred Streit	36	Jan. 25
Enso-Gutzeit research facilities serve the industry in Finland	29	May 31
Environment: how industry sees its and government's role —Karl R. Bendetsen	58	June 28
Future of inking and ink drying may lie in technology —Alex Glassman	59	Sept. 20
Government relations and our industry—what to do about them —Karl R. Bendetsen	42	April 5
How many $ $ $ are you losing on pulp bale moisture —Herbert Freedom	47	Jan. 25
How new pulp and paper projects are originated and executed	30	Nov. 1
How to describe and test pulp properties or characteristics		

	PAGE	ISSUE
—Gunnar Gavelin	40	July 5
HWC improves customer service with facsimile communications	39	Sept. 6
Industry pulse still measured by Mr. Pulp	35	Jan. 25
I.P.C. executives' conference hears about problems & progress	24	May 31
Nekoosa label 'production system' features photo-direct process	36	Aug. 30
New pilot fourdrinier at the national bureau of standards	42	Feb. 15
Nonwovens and disposables attract wide interest at IDEA 71	46	Dec. 6
Of Darwin, dinosaurs and the survival of the paper industry —Karl F. Simpson, Jr.	61	Oct. 18
On-machine training vital in developing technical personnel	25	Jan. 4
Physical properties of fibers and pulps from wood and nonwood plant fibers —J. N. McGovern	27	Aug. 30
Pilot machines give flexibility to Clupak's R & D program	26	Dec. 27
Printing characteristics of papers containing non-wood fibers —Dr. Julius Grant	55	Sept. 20
Rapid growth in bagasse evident as world experts gather in Spain —Martin MacLeod	30	Nov. 22
Shortening the time between experimental work & full production —James Gormely	38	April 26
Stack-type pulp arrangement reduces machine room size	46	May 17
TAPPI fifty-sixth annual meeting presented a mixed bag	25	March 22
The American Paper Institute; what it is and how it works —Richard A. Botshon	54	March 15
Tinius Olsen unveils speedy automatic tensile machine	34	June 14
Transportation: last major area for cost reduction —Phillip J. Maddex	36	Sept. 27
Unique pilot paper machine at Sandy Hill development center	42	Oct. 25
Unusual pilot/commercial paper machine installation in Finland	46	Nov. 29
What about municipal trash as a source of papermaking fibers? —John C. W. Evans	79	Sept. 13
What will happen at the 1971 EUCEPA conference —Alex Glassman	50	Sept. 20
Your right to manage: by ordination or achievement —W. Wyatt Shorter	44	May 24

New Mills & Machines

Franklin mill completes mammoth $50 million expansion program	33	Oct. 11
Georgia-Pacific completing $92 million expansion at Crossett	40	May 10
Groveton's "first love" is back for thirds	28	June 21
IP's Ticonderoga mill sets new industry and community standards —Martin MacLeod	34	Nov. 1
Iran's first modern mill opened by the Shah	34	Jan. 11
Nation's largest ultra former goes on stream at Manayunk	38	July 12
New mills and major expansions in the U.S. definitely underway	44	March 8
New pilot fourdrinier at the national bureau of standards	42	Feb. 15
Olinkraft adds on an innovative NSSC corrugating medium mill —Martin MacLeod	46	Dec. 13
Papeles Venezolanos completes tissue expansion program	32	Oct. 4
Performer concept a proven fact with big new machine in France —Martin MacLeod	38	Oct. 25
Ten year old tissue mill continues growth—now adds third machine	30	June 7
Unique handling system developed for tissue converting at Crossett	56	June 28
Unique pilot paper machine at Sandy Hill development center	42	Oct. 25
Unusual pilot/commercial paper machine installation in Finland	46	Nov. 29

Papermaking

A systematic procedure to examine paper machine modernization	57	May 17
Air flow and pocket ventilation in the dryer section —Mauri A. Soininen	39	March 8
Choosing hard nip press felts for optimum drying results —Axel V. Cedercreutz	34	June 7
Computerized paper machine runs efficiently at Nekoosa Edwards —Edward T. Tesch	46	May 24
Control of paper and board quality featured at British conference	54	May 3
Drying—present methods and trends discussed at U. K. meeting	31	Dec. 27
Factors influencing venta-nip press water removal efficiency —C. Neil Rempel	28	Dec. 27
Greater use of secondary fiber by application of dry forming —Fred D. Iannazzi	44	Oct. 25
How the fiber-water relationship affects the drying process —D. Attwood	31	Feb. 8
Improved dryer belt arrangement yields a number of benefits —E. E. Crist	30	Dec. 27
Is the dry forming of conventional paper grades feasible today?	40	Sept. 6
Mechanism of paper drying on steam-heated cylinders —E. Race	32	March 1
Mill experience proves worth of new wet end equipment —Staff report from Oxford Paper Co.	34	April 12
New approach to measuring formation —a matter of uniformity —O. Kallmes	46	Oct. 25
New clothing developments for fine paper machines	78	Nov. 15
New combination fabric fully proven for wet press clothing		

	PAGE	ISSUE
—Thomas J. Liu	30	May 31
New concept of through drying of paper is rapidly gaining ground —Edward T. Bryand	64	March 15
New four group concept for the selection of dryer felts —Joseph F. Longo & Edward De Crosta	35	Oct. 4
New process uses foam in papermaking instead of avoiding it	44	Nov. 29
Newton Falls still expanding after 75 years of operation —Charles G. Waelde & M. R. Castagne	44	May 3
Novel consistency meter for paper machine headboxes —N. Bailey & O. Kallmes	46	Sept. 6
One hundred and four year old paper company going strong	28	April 26
Orr's Triplex: a new three-fabric concept in paper makers' felts	37	July 26
Paper drying on felt covered cylinders function of the felt —E. Race	38	March 29
Polyester monofilament forming fabrics for fourdriniers —E .R. Cruden & Colin Wild	38	Jan. 11
Pressure/vacuum pulse analysis shows advantages of foils —Thomas O. P. Speidel & Norman Beauchemin	32	April 26
Production of non-wovens on the paper machine and their use —W. Willicks	45	May 24
Significant trends in paper machine design and operation—I —John C. W. Evans & Charles Waelde	30	Aug. 9
Significant trends in paper machine design and operation—II —John C. W. Evans & Charles Waelde	42	Aug. 16
Statistical evaluation of a paper machine headbox's performance —J. Howarth & N. Shoumatoff	60	June 28
Successful Bel-Baie former now further improved	45	Feb. 15
Suction boxes, new felts enhance water removal at press section —E. Richard Woodard	30	March 8
25th APPITA meeting features new papermaking developments	54	May 17
Unique Finnish lumber, pulp and paper complex and waste paper use	26	July 5
W. M. U. conference features sheet forming and waste paper use	46	Feb. 15

Personnel

Drastic change in the technical manpower situation	44	Nov. 8
Employees learn what they live not what they are told —Fred Streit	36	Jan. 25
Importance of mill visits in training technical personnel	52	May 3
Of Darwin, dinosaurs and the survival of the paper industry —Karl F. Simpson, Jr.	61	Oct. 18
On-machine training vital in developing technical personnel	25	Jan. 4
Operators' manual preparation and literature surveys as training tools	35	April 26
Pollution is a responsibility of individuals—both as employees and as citizens —George H. Rand	43	May 24
Putting the in-plant trained technical man to best use	38	June 7
Your right to manage: by ordination of achievement —W. Wyatt Shorter	44	May 24

Pulping Chemical Recovery

Additives aid sulphite recovery; by-products depend on process —T. T. Collins, Jr. & P. E. Shick	52	April 19
Electrolyses, electrodialysis, ion exchange, molecular absorption and ion exclusion —T. T. Collins, Jr. & P. E. Shick	41	Jan. 11
Engineering and economic aspects of sodium base sulphite recovery —T. T. Collins, Jr. & P. E. Shick	37	Nov. 8
New monitoring method alleviates recovery furnace risks	38	Jan. 25
Progress report on fluidized bed processing pulping liquors	58	Oct. 18

Stock Preparation

Automatic refiner control by drainage rate: a progress report —Henry S. Gilbert	32	June 21
Automatic stock proportioning system at Finch Pruyn	35	Jan. 18
Characteristics of waste papers dictate repulper requirements —Norman F. Hoch	80	Sept. 13
Computer applications from stock preparation to shipping—I —Roger Grant	38	July 19
Computer applications from stock preparation to shipping—II —Roger Grant	38	July 26
Current trends in refining mechanical pulp rejects —Joseph A. Kurdin	46	Jan. 18
Effect of repulping on sheet properties & fiber characteristics —Robert C. McKee	34	May 24
Refining—how to gain optimal performance from secondary fiber —Donald W. Danforth	76	Sept. 13
Washer extractor aids cotton paper processing operation —T. A. King	38	May 31

Water and Air Effluent

Additives aid sulphite recovery; by-products depend on process —T. T. Collins & P. E. Shick	52	April 19
Aeration equipment versus cold climate: one company's answer —J. P. Hartley	36	July 19
Air/water conference emphasizes practical side of waste control	42	April 19
Decolorizing of kraft bleach effluents: new one-step process		

	PAGE	ISSUE
—Gerald D. Button	84	Nov. 15
Difficult liquid effluent problem being solved by K-C	43	June 14
Extensive pollution abatement will be practised at Eurocan	36	July 5
Factors to consider in selecting air pollution control equipment —James E. Roberson	40	June 7
Fiber reclamation processes—what to do with what's left over —Isaiah Gellman	73	Sept. 13
Hammermill is installing largest thermoplastic pipeline	31	Jan. 4
How much will pollution control cost? and who will pay for it? —J. D. Rushton	60	March 15
Huge new clarifier goes into operation at Brunswick	29	March 1
IP's Ticonderoga mill sets new industry and community standards —Martin MacLeod	34	Nov. 1
Island revamped in Savannah to provide secondary treatment site	25	Aug. 2
Less water pollution and lower costs offered by O_3 bleaching	36	March 29
Measuring water pollution with on-line sensing devices —W. C. Rutledge	29	Dec. 27
New method of fiber recovery from pulp and paper waste sludge —B. Forsell	34	March 8
Pollution is a responsibility of individuals—both as employees and as citizens —George H. Rand	43	May 24
Sonoco starts up new secondary treatment plant for liquid waste	28	March 29
The environment: how industry sees its and government's role —Karl R. Bendetsen	58	June 28
Westvaco scales up SO_2 recovery process using activated carbon	36	April 5
Waste Paper		
Ballistic separator for recovery of paper from garbage —L. Berkowitz	46	Oct. 11
Characteristics of waste papers dictate repulper requirements —Norman F. Hoch	80	Sept. 13
Consumption of paper stock by United States mills in 1969 and 1970 —W. S. McClenahan	36	Nov. 1
Effect of repulping on sheet properties & fiber characteristics —Robert C. McKee	34	May 24
Fiber reclamation processes—what to do with what's left-over —Isaiah Gellman	73	Sept. 13
Fiber recovery from solid waste and its potential use —John C. W. Evans	54	Aug. 23
First town to recover waste garbage —William Herbert	48	Feb. 15
Future prospects for increased waste paper recycling —Dr. J. E. Atchison, R. E. L. Wheless & T. T. Collins, Jr.	58	Sept. 13
Future wood needs for papermaking fibers should not be a problem —Richard J. Auchter	58	Aug. 23
Greater use of secondary fiber by application of dry forming —Fred D. Iannazzi	44	Oct. 25
Handling the problem papers—wet strength, asphalt, poly-coated, etc. —A. J. Felton	70	Sept. 13
How will we meet future fiber demand of the paper industry? —G. W. Kalotschke	64	June 28
Inside the waste paper market—comments from a dealer —George A. Graham	68	Sept. 13
Many problems involved in increasing utilization of waste paper —Wayne F. Carr	48	May 17
Monitoring wet stock brightness during deinking operations —M. Finkel, L. Holland & L. Raksoh	48	Dec. 6
Nation's largest ultra former goes on stream at Manayunk	38	July 12
New method of fiber recovery from pulp and paper waste sludge —B. Forsell	34	March 8
Our industry's fiber requirements in the seventies and eighties —Dr. Benjamin Slatin	42	Oct. 11
Potentials and problems in recycling telephone directories —George K. Mezinis	45	Dec. 13
Recycling fibers-economics and the environment —Bernard W. Recknagel	50	Feb. 15
Refining—how to gain optimal performance from secondary fiber —Donald W. Danforth	76	Sept. 13
Secondary fiber for paperboard—how the waste paper is processed —Roger H. Cunningham	65	Sept. 13
Secondary fiber requirements for corrugating medium —Kenneth E. Lowe	51	Feb. 15
Secondary fiber use highlighted at empire state TAPPI conference —Martin MacLeod	36	Aug. 9
Secondary fibers conference outstanding success	52	Oct. 18
The situation abroad—Germany —Franz Koenig	86	Sept. 13
The situation abroad—Great Britain —H. K. W. Hodges	88	Sept. 13
The situation abroad—Japan —Martin MacLeod	84	Sept. 13
Waste paper collection and marketing as practised in Japan —Roy H. Yahiro	44	Dec. 6
What about municipal trash as a source of papermaking fibers? —John C. W. Evans	79	Sept. 13
What general services administration is doing about waste paper —Robert L. Kunzig	50	July 12
What the solid waste council of the paper industry is doing —F. S. Crysler	48	July 12
What's ahead in waste paper use?		

	PAGE	ISSUE
—J. Rodney Edwards	46	April 5
What's in the 'wastepaper fiber' collected from municipal trash —Gary C. Myers	32	Aug. 30
Whither waste paper use? and what about deinking? —Foster P. Doane	38	April 12
W. M. U. conference features sheet forming and waste paper use	46	Feb. 15
Wood		
Advances in pulpwood utilization and pulping technology —J. N. McGovern	31	Jan. 11
Carthage-Norman twisted-knife chipper cuts power consumption —Frank Pine	32	Jan. 4
Future wood needs for papermaking fibers should not be a problem —Richard J. Auchter	58	Aug. 23
How we may get more mileage from international fiber sources —Borje K. Steenberg	59	May 17
Interstate reclaims fiber from pulp mill rejects and stumpwood	40	July 12
New developments in the drum barking of long logs —Gustaf Ranhagen	26	Feb. 8
One hundred per cent timber harvesting: a dream come true?	28	July 26
Our industry's fiber requirements in the seventies and eighties —Dr. Benjamin Slatin	42	Oct. 11
Outlook for timber supply is good —Clifford M. Hardin	48	April 5
Problems in measuring outside chip storage pile inventory —A. L. C. Nelson	50	May 3
Ring barkers form nucleous of highly automated barking plant	36	June 7

Author Index to 1971 Feature Articles

A

Alexander, D. K.—Grinding mechanism and relationship of energy and pulp quality—26, Aug. 9.

Atchison, Dr. J. E., Collins, T. T. Jr. and Wheless, R. E. L.—Future prospects for increased waste paper recycling—58, Sept. 13.

Attwood, D.—How the fiber-water relationship affects the drying process—31, Feb. 8.

Auchter, Richard J.—Future wood needs for papermaking fibers should not be a problem—58, Aug. 23.

B

Bailey, N. and Kallmes, O.—Novel consistency meter for paper machine headboxes—46, Sept. 6.

Beauchemin, Norman & Speidel, Thomas O. P.—How the drainage from foils differs from that of table rolls—68, March 15; Pressure/vacuum pulse analysis shows advantages of foils—32, April 26.

Bendetsen, Karl R.—Government relations and our industry—what to do about them—42, April 5; The environment: how industry sees its and government's role—58, June 28.

Benner, Don W.—High efficiency removel of oil aerosols from compressed air—49, Sept. 6.

Beres, Laszlo—Hungary's paper industry moves along according to plan—68, Sept. 20.

Berkowitz, L.—Ballistic separator for recovery of paper from garbage—46, Oct. 11.

Booth, George L.—How the printing surface depends on the coating system used—63, Sept. 20.

Botshon, Richard A.—The American Paper Institute; what it is and how it works—54, March 15.

Brockington, P. L.—Corrugated box industry economics in 1971—76, Nov. 15.

Brodhag, Earl E.—Which coating clay should be used for which paper grades—36, Jan. 18.

Bryand, Edward T.—New concept of through drying of paper is rapidly gaining ground—64, March 15.

Button, Gerald D.—Decolorizing of kraft bleach effluents: new one-step process—84, Nov. 15.

C

Canty, Claire and Perry, Frederick G.—Improved economics and better quality for mechanical pulps—30, July 26.

Carr, Wayne F.—Many problems involved in increasing utilization of waste paper—48, May 17.

Castagne, M. R. & Waelde, Charles G.—Newton Falls still expanding after 75 years of operation—44, May 3.

Cedercreutz, Axel V.—Choosing Hard Nip press felts for optimum drying results—34, June 7.

Collins, T. T. Jr. and Shick, P. E.—Additives aid sulphite recovery; by-products depend on process—52, April 19; Electrolysis, electrodialysis, ion exchange, molecular absorption and ion exclusion—41, Jan. 11; Engineering and economic aspects of sodium base sulphite recovery—37, Nov. 8.

Collins, T. T. Jr., Atchison, Dr. J. E. and Wheless, R. E. L.—Future prospects for increased waste paper recycling—58, Sept. 13.

Crist, E. E.—Improved dryer felt arrangement yields a number of benefits—30, Dec. 27.

Cruden, E. R. and Wild, Colin—Polyester monofilament forming fabrics for fourdriniers—38, Jan. 11.

Crysler, F. S.—What the solid waste council of the paper industry is doing—48, July 12.

Cunningham, Roger H.—Secondary fiber for paperboard—how the waste paper is processed—65, Sept. 13.

D

Dahl, E. B. & Neubauer, E. P.—Modern practices can present hazards to S. S. suction rolls—46, Aug. 23.

Danforth, Donald W.—Refining—how to gain optimal performance from secondary fiber—76, Sept. 13.

Danner, John R.—Photocopy papers meet rapidly expanding market opportunities—36, Feb. 8.

DeCrosta, Edward F. and Longo, Joseph F.—New four group concept for the selection of dryer felts—35, Oct. 4.

Delattre, Michel G.—Hydrogen peroxide bleaching benefits stability—43, July 5.

Doane, Foster P.—Whither waste paper use? and what about deinking?—38, April 12.

Drayton, W. E.—Proper selection of chain slings holds key to safe load lifting—45, Jan. 18.

XUM

Dunning, H. F.—The outlook for this year—40, Jan. 11.

E

Eberth, Peter J.—SCM's automatic sheeting system protects fragile photocopy paper—40, April 19.
Edwards, J. Rodney—Signs of life in paperboard—44, July 12; What's ahead in waste paper use?—46, April 5.
Evans, John C. W.—Fiber recovery from solid waste and its potential use—54, Aug. 23; Some improvement in paperboard but basic problems continue—42, July 12; What about municipal trash as a source of papermaking fibers?—79, Sept. 13.
Evans, John C. W. and Waelde, Charles G.—Significant trends in paper machine design and operation-I—30, Aug. 9; Significant trends in paper machine design and operation-II—42, Aug. 16.
Evans, Thomas J.—Paper and board applications of wax are constantly growing—50, April 19.

F

Farnworth, Edwin—Low noise from conveyors with centrifugal compressors—41, Feb. 1.
Felton, A. J.—Handling the problem papers—wet strength, asphalt, polycoated, etc.—70, Sept. 13.
Finkel, M., Holland, L. and Raksoh, L.—Monitoring wet stock brightness during deinking operations—48, Dec. 6.
Forsell, B.—New method of fiber recovery from pulp and paper waste sludge—34, March 8.
Freedman, Herbert—How many $ $ $ are you losing on pulp bale moisture?—47, Jan. 25; How to readily obtain brighter pulp or smooth out variations—34, Sept. 27.

G

Gavelin, Gunnar—How to describe and test pulp properties or characteristics—40, July 5; Small integrated chip groundwood mill started in Holland—30, Dec. 20; Time to take another look at mechanical pulp fractionation?—40, Nov. 1.
Gellman, Isaiah—Fiber reclamation processes—what to do with what's left over—73, Sept. 13.
Gilbert, Henry S.—Automatic refiner control by drainage rate: a progress report—32, June 21.
Glassman, Alex—Future of inking and ink drying may lie in new technology—59, Sept. 20; What will happen at the EUCEPA conference—50, Sept. 20.
Gormely, James—Shortening the time between experimental work & full production—38, April 26.
Graham, George A.—Inside the waste paper market—comments from a dealer—68, Sept. 13.
Grant, Dr. Julius—Printing characteristics of papers containing non-wood fibers—55, Sept. 20.
Grant, Roger—Business applications for computers, 48, Aug. 16; Computer applications—from stock preparation to shipping-I—38, July 19; Computer applications from stock preparation to shipping—II—38, July 26; Computer applications in departments supporting production—38, Aug. 9; Computer applications: woodlands through beach plant-I—44, June 14; Computer applications: woodlands through bleach plant-II—36, June 21; Control theory and how to use it—38, March 1; Digital and analog computers, their hardware and how they work—38, Jan. 18; Digital and analog computers, their hardware and how they work-II—36, Feb. 1; Explaining the fundamentals of digital process computers—48, Jan. 4; Glossary of basic computer terms—42, April 12; Types of computers and their methods of application—30, March 29.

H

Hambleton, Dana A.—Coordinated control a workable alternative to computerization—34, May 31.
Hardin, Clifford M.—Outlook for timber supply is good—48, April 5.
Hartley, J. P.—Aeration equipment versus cold climate: one company's answer—36, July 19.
Herbert, William—First town to recover waste garbage—48, Feb. 15.
Hoch, Norman F.—Characteristics of waste papers dictate repulper requirements—80, Sept. 13.
Hodges, H. K. W.—The situation abroad—Great Britain (waste paper)—88, Sept. 13.
Holland, L., Finkel, M. and Raksoh, L.—Monitoring wet stock brightness during deinking operations—48, Dec. 6.
Howarth, J. and Shoumatoff, N.—Statistical evaluation of a paper machine headbox's performance—60, June 28.

I

Iannazzi, Fred D.—Greater use of secondary fiber by application of dry forming—44, Oct. 25.

K

Kallmes, O.—New approach to measuring formation—a matter of uniformity—46, Oct. 25.
Kallmes, O. and Bailey, N.—Novel consistency meter for paper machine headboxes—46, Sept. 6.
Kalotschke, G. W.—How will we meet future fiber demand of the paper industry?—64, June 28.
King, T. A.—Washer extractor aids cotton paper processing operation—38, May 31.
Koenig, Franz—The situation abroad—Germany (waste paper)—86, Sept. 13.
Krashes, David—Metal fatigue isn't inevitable in mill equipment—30, March 1.
Kunzig, Robert L.—What general services administration is doing about waste paper—50, July 12.
Kurdin, Joseph A.—Current trends in refining mechanical pulp rejects—46, Jan. 18.

L

Lehigh, W. R. and Mosher, R. H.—Correct computer control can improve mill operations—82, Nov. 15.
Liu, Thomas J.—New combination fabric fully proven for wet press clothing—30, May 31.
Locke, Edwin A. Jr.—Basis for confidence—40, April 5.
Longo, Joseph F. and DeCrosta, Edward F.—New four group concept for the selection of dryer felts—35, Oct. 4.
Lowe, Kenneth E.—Secondary fiber requirements for corrugating medium—51, Feb. 15.

M

MacLeod, Martin—Autocook system brings full automation to batch digesters—36, Aug. 16; Finishing conference program winds a "soft roll" in Houston—40, Nov. 29; IP's Ticonderoga mill sets new industry and community standards—34, Nov. 1; I.S.A. pulp & paper symposium features on-machine instruments—40, Oct. 4; Olinkraft adds on an innovative nssc corrugating medium mill—46, Dec. 13; Periformer concept a proven fact with big new machine in France—38, Oct. 25; Rapid growth in bagasse evident as world experts gather in Spain—30, Nov. 22; Secondary fiber use highlighted at empire state TAPPI conference—36, Aug. 9; TAPPI alkaline pulping committee cooks up a high yield conference—38, Dec. 6; The situation abroad—Japan (waste paper)—84, Sept. 13.

Maddex, Phillip J.—Transportation: last major area for cost reduction—36, Sept. 27.
Meister, Irene W.—World exports of kraft linerboard and corrugating medium—22, Aug. 2.
Mezinis, George K.—Potentials and problems in recycling telephone directories—45, Dec. 13.
Michaud, Ralph W.—Paper industry appears on threshold of its most promising years—38, Sept. 27.
Mosher, R. H. and Lehigh, W. R.—Correct computer control can improve mill operations—82, Nov. 15.
Myers, Gary C.—What's in the 'wastepaper fiber' collected from municipal trash—32, Aug. 30.
Myhrer, Erik—Norway's small pulp and paper industry is export oriented—62, Aug. 23.
